Clapp affidavit - statute?

(statement losses)

The second passage I have marked may well reflect other than an effort to address any question of the statute and it may address that and more. The date will tell you if I mean this also in "His recollection is precisely as I represented to you." I am sure that this also was my separate effort to exercise discovery, to obtain records lawyers did not obtain.

You may now have no interest in the first marked paragraph. I have marked it for future reference. It is exactly as I here state, we more than doubled our capacity, had the proof, and our income fails to represent any substantial change until it lowered still another bit as the problems became insoluble. With a fixed and unchanging price twice the capacity should have meant twice the capacity. On this base alone our annual loss was the equal of the prior annual income.
